

## **IT MANAGEMENT PROGRAMS**

### **Developing IT Policies—Information Security in IT Governance**

This course has provided me additional knowledge for me to implement/write policies. Showing of instructor's and participants' experience is also good for me.

### **ISMS - Implementation & Auditor/ Lead Auditor**

The ISMS Lead Auditor Training course was organized by IDC Training House in an efficient manner. I highly recommend organizations to send their employees for the ISMS Lead Auditor Training organized by IDC Training House. The presentations by the Instructor (Mr. Philip Ku) were clear, and understandable. The training objectives for each topic were identified, and followed. The training materials were relevant, and well organized. The week-long training met my expectations. I would rate the training overall as excellent. After the training, and the examination, I'm able to strength the value proposition of the internal control process, and establishing greater assurance in risk management, and compliance for my organization. Thanks Mr. Philip Ku and IDC!!!

**Vijandran Ramasamy**  
Senior Information Security Officer  
ISM Insurance Services Malaysia Berhad

I wish to extend my sincere thanks for the courses organized by IDC Training House. I'm very pleased and impressed with the facilities provided by IDC. The engagement of tutors is extremely highly professional qualified with the experience, expertise, skills, deliverables, knowledge transferred, relationship, etc will definitely worth the fees, time, effort spend for attending the courses. A good example, I've build my total confidence in gaining the ISO 27001: 2005 Certification Audit within 3 months after attending the ISO 27001 Lead Auditor course in May 2007. I will highly recommend IDC Training House to whom that wishes to gain the extra knowledge and skills to contribute to the organization growth, or personal development.

## ISMS - Implementation

The class is really fun & productive as it provides a lot of interaction case studies among lecturer & students rather than just ton of theories that make it a difference.

I would strongly recommend the training course to those who wants to learn to be the ISMS auditor or want to understand the mindset of the ISMS auditor during the audit process!!!

**Henry Ho Kien Wai**

Head, Group IT

KUB Malaysia Bhd

The ISMS Implementation organized by IDC is a good exposure and knowledgeable for organization that has intention to perform ISMS implementation and certification. From the course, I learnt the skills and processes on how to establish ISMS, the controls and risks involvement in the ISMS implementation. I strongly recommend to organization that has intention to pursue towards ISMS certification. Lastly thank you to the instructor (Philip Ku) as well as to IDC for the well coordination work and assistance to make the workshop a success.
